EMPLOYEE OWNED

## WASHING

- ✓ 40 degrees or less
- ✓ Wash inside out
- ✗ Do not use fabric conditioner
- ✗ Do not bleach

PERFORMA®

25

We recommend washing your garment on a gentle action 40 degree cycle (synthetics) with non-biological or colour care detergent. For lower environmental impact, Performa® 25 garments can also be washed at 30 degrees. To minimise pilling, wash with garments of similar fabric and weight.

**Do not use fabric conditioner.**

## DRYING

- ✓ Reshape while damp
- ✓ Dry flat
- ✗ Do not tumble dry

**We advise you to air dry your garment flat.** To avoid creasing, remove garments from the machine as soon as possible. Do not put your Performa® 25 garments on a hanger or radiator to dry, as this will mark or heat damage your knitwear.

## IRONING

- ✗ Do not iron

## PILLING

- ✗ Avoid excessive abrasion and friction

If the fibres in your garment become entangled, they may form visible pills on the surface of the fabric. You can minimise the effects of pilling by avoiding friction and abrasion, rubbing (from bag straps or spot-cleaning) and snagging (from Velcro® or sharp edges). Remove pills with a de-fuzzing razor, a depilling comb or gently by hand.
